# The Diploma IN SCIENCE

The Diploma in Science will be specifically designed to better enable the transition from education to future employment, allowing students to obtain a fully-rounded qualification at different levels and gain essential practical experience in a work-related environment.

Developed in consultation with employers, schools, colleges and universities, the Diploma in Science:

- will aim to equip students with essential skills, that allow them to be better prepared for work and continuing education
- will be a high quality, challenging qualification that will be valued by industry and education
- will aim to provide flexibility and choice with options to pursue individual interests in work or education
